

Letter of note.

02-23-2023

Dear Mark:

Hi Senator Mark Warner, I'm inventor Woolls you may have heard of me, well I would like to go over my ideas the idea named "Solar-Rx", the "Rom-X" and "360-Wave-Disk".

To its competitiveness in science and tech, we hold with my ideal the power of it all in the "United States" we hold the cure to the energy crisis and the "Chip Act law of 2022" with the Dsik that Comes in assorted chips that can fill the market of our need's and want by, independent needs By that of demand and price.

We the "United States" will need A Bill Of Declaration Of Home Independent Energy we have Space power and with devices of intellectual property and space-to-Earth Defense, we have the Power of the U.S in our hands, and that We can cut off the energy of the grid's of "North Korea" Of the "North Hemisphere" of the "United State's" with our newfound power, are home's will half Cut, we save on Oil, Coal, and Energy, we keep our space at the bay of our defense system with the new Laser adapted with fusion power by the Rom-X for the "Solar-Rx".

With this new power, we can use our Energy companies such as "Pepco" and "Domino" as other means of use for it, such as ocean cleaning and river impairment we can use them for cleaner water, for all sea and river life.

This gives us an amount of safety for wildlife this is my hope and dreams that if any Fellow or Mam or child fill the same way I do, this is the only means for our country to be stable number #1 power of product for our right's at freewill, this and are bill of the oath, which i name this document the "Hammer of God".

In God We Trust

We hold this document by are bipartisan

Amen

Sincerely

Michael Stephen Woolls

“Inventor Woolls”
